EXPERIENCE

Emerson Automation Solutions

Software Engineer Apprenticeship | March 2022 – present

- Create PowerShell scripts to automate a portion of the new build install process.
- Create unit tests and assist in writing code in C# for Test Driven Development.
- Won first place with my team in Emerson's quarterly Hackathon on a project designed to gamify and reduce the onboarding time for new hires.

Wipro Ltd.

Software Quality Assurance Engineer at Facebook | January 2021 – March 2022 (1-year, 2-months)

- Triaged and reproduced bugs reported during development of an Artificial Intelligence assistant ("Hey Facebook") for the Oculus team. (5-months)
- Triaged and reproduced bugs reported before each build release on Instagram team. (9-months)
- Trained new team members and organized shadowing sessions to teach our standardized process.

O's Cafe at The University of Texas

Evening Shift Manager | August 2017 – March 2020 (due to Covid-19)

- While finishing my degree, managed a team of 6 employees, motivating them to work as a team, and complete their nightly duties efficiently.
- Solved any technical problems involving any equipment in the cafe (i.e., register software, display coolers, etc.)
- Made the nightly count for each register and made the nightly deposit.

Trinity Couriers

Amazon | December 2016 - August 2017

- Communicated and planned daily routes with shift dispatcher.
- Created and maintained digital records of deliveries.
- Met and exceeded daily metrics.

Invenio Marketing Solutions

Sales Representative | July 2016 - December 2016

- Made outgoing sales calls.
- Met weekly sales quota.
- Maintained records and data in sales specific software called 'Salesforce'.

Rootstock LLC

Warehouse Manager | February 2013 - July 2016

- Maintained and troubleshot service equipment.
- Met with the incoming and outgoing truck drivers to ensure the correct products were shipped or received.
- Kept accurate records of new and existing products.
